

TUFF-ASH

Sling Protection Products

HP - HIGH PERFORMANCE EDGE LIFTER is a **TUFF-ASH** Sling Protection Product that is designed for use with Web Slings and Round Slings around corners and edges. The blocking material inside the Edge Lifter is designed to lift the sling up and around the edge of the load thus limiting the contact of the sling with the edge. The Edge Lifter offers excellent abrasion and cut resistance and has been proven through rigorous testing to out-perform similar products.

HP EDGE LIFTER

PART NUMBER	FOR SLING WIDTH	SLEEVE WIDTH APPROX.

XT-SLEEVE

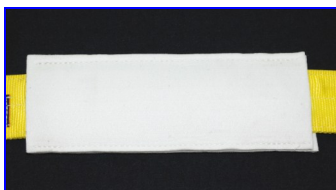

XTQ-QUICK SLEEVE

XT - EXTRA TUFF SLIDING WEAR SLEEVE is a **TUFF-ASH** Sling Protection Product that offers excellent abrasion resistance for Web Slings and Round Slings. The XT is offered with or without the "quick attach" hook and loop side opening. Our XT pad is manufactured with our heavy duty textured webbing and packed with additional web to create three layers of protection on each side. The XT is truly one of the best abrasion and wear protection sleeves on the market.

*BODY WRAP

*EYE WRAP

*TUFF-ASH ADD-ONS LIKE TEXTURIZED NYLON CAN BE ADDED TO A SLING TO HELP PROTECT THE LOAD BEARING FIBERS FROM DAMAGE DUE TO ABRASIVE SURFACES AND SNAGGING. OTHER TYPES OF MATERIALS ARE AVAILABLE BASED ON THE APPLICATION.

WARNING!

All Wear Sleeves and Edge Lifters should be carefully selected based on the type and weight of the load to be lifted. The size, shape, and type of material, as well as proper alignment is critical for the Wear Sleeves and/or Edge Lifters to perform properly. Failure to use the correct size, shape, type of material and proper alignment may result in sling failure which could cause Serious Injury or Death. Always inspect Slings, Sleeves and Edge Lifters for damage before, during and after every lift.
